MARYLAND POPULATION AND HOUSING DATA
State, Regional, and County Trends Through 1980

August, 1981

Statistical Report Series
Department of State Planning Publication 81-21
Price: \$5.00

TABLE OF CONTENTS

Foreword		iii
Report Organization		v
Section I.	State Planning Regions	1
Section II.	Baltimore Region	13
Section III.	Suburban Washington Region	25
Section IV.	Western Maryland Region	37
Section V.	Frederick Region	49
Section VI.	Southern Maryland Region	61
Section VII.	Upper Eastern Shore Region	73
Section VIII.	Lower Eastern Shore Region	85
Appendix A.	Population Trends by Region and County, 1900-1980	97
Appendix B.	Population by Race by Region and County, 1970-1980	107
Appendix C.	Population and Housing by Region and County, 1970-1980	117
Appendix D.	Data Source Guide	127

FOREWORD

This statistical report provides historical and current population and housing information based on the decennial census enumerations through 1980. The Department of State Planning has assembled this data to provide an historical base from which current and projected trends can be assessed.

The data displayed in this report are broken down by State Planning regions and the political subdivisions within each of the planning regions. Statistical tables are provided which display population trends, components of population change, population by race, and components of population and housing.

This report is one in a series of statistical reports to be prepared by the Department of State Planning's Office of Planning Data based on data released from the 1980 Census. The next report in this series will examine population trends by minor civil divisions and municipalities. Subsequent reports will examine in more detail population and housing patterns for the counties based on data to be released by the Census Bureau starting in the fall of 1981.

REPORT ORGANIZATION

Sections

The body of this report consists of eight sections, each of which contains a set of tables summarizing census information on population and housing. Section I includes data for the State and its seven planning regions. The succeeding sections (II through VIII) include similar data for each region and its respective counties. The eight sections and their component geographic areas are:

Section I. State Planning Regions - Baltimore, Suburban Washington, Western Maryland, Frederick, Southern Maryland, Upper Eastern Shore, Lower Eastern Shore

Section II. Baltimore Region - Anne Arundel, Baltimore City, Baltimore County, Carroll, Harford, Howard

Section III. Suburban Washington Region - Montgomery, Prince George's

Section IV. Western Maryland Region - Allegany, Garrett, Washington

Section V. Frederick Region - Frederick

Section VI. Southern Maryland Region - Calvert, Charles, St. Mary's

Section VII. Upper Eastern Shore Region - Caroline, Cecil, Kent, Queen Anne's, Talbot

Section VIII. Lower Eastern Shore Region - Dorchester, Somerset, Wicomico, Worcester

Tables

Within each section of the report eleven tables are presented. Tables 1 and 2 show population trends, table 3 displays data on the components of population change, tables 4, 5, and 6 present data on population by race, and tables 7, 8, 9, 10, and 11 display data on the components of population and housing. A brief description of each table follows:

Table 1 - Population 1930-1980, provides counts of the total population and the intercensal percent change in popula-

tion and average annual growth rate (AAGR).^{1/}

Table 2 - Population 1930-1980 (Percent of Total), provides counts of the total population and each jurisdiction's population as a percent of the total population for the region.

Table 3 - Components of Population Change 1950-1980, provides data on the change in population due to net natural increase (births less deaths) and net migration (in migration less out migration).

Table 4 - Population by Race 1950-1980, provides counts of the population by race (white and non-white) and the intercensal percent change in population and average annual growth rate (AAGR).

Table 5 - Population by Race 1950-1980 (Percent of Total), provides counts of the population by race and each jurisdiction's population as a percent of the total population by race for the region.

Table 6 - Population by Race 1950-1980 (Percent Non-White), provides counts of the total ^{2/} and non-white populations and displays the non-white population as a percentage of the jurisdiction's total population.

Table 7 - Population and Housing Units 1960-1980, provides counts of population and housing units along with the absolute and percent changes in population and housing units for the intercensal periods.

Table 8 - Persons in Households and Households 1960-1980, provides counts of the number of persons in households along with the absolute and percent changes in household population and households for the intercensal periods.

Table 9 - Persons in Households and Households 1960-1980 (Persons per Household), provides counts of persons in households, the number of households, and the average number of persons per household.

^{1/} The average annual growth rate (AAGR) is analogous to a bank's interest rate. The AAGR is the annual rate at which the population of a jurisdiction would have to grow each year in order to obtain the actual population observed ten years later.

^{2/} The total population figures in Table 6 are the sum of the white and non-white populations from Table 5. Revised 1970 population figures for the total population only have been published by the U.S. Bureau of the Census. The revised 1970 total population figures appear in all other tables of the report. For this reason the 1970 total population figures in Table 6 may not be exactly the same as those shown in the other tables.

Table 10 - Population, Persons in Households, and Persons in Group Quarters (1960-1980), provides counts of the total population, the number of persons in households, and the number and percentage of total population living in group quarters.^{3/}

Table 11 - Housing Units and Change in Vacant Units (1960-1980), provides counts of total housing units, the number of units occupied, and the number and percentage of total housing units vacant.^{4/}

Appendices

Following the eight sections with their respective tables on population and housing statistics are four appendices:

Appendix A. Population Trends by Region and County, 1900-1980, displays in line chart format the trends in population for each region and county.

Appendix B. Population by Race by Region and County, 1970-1980, displays in bar chart format the size of the white and non-white populations for each region and county.

Appendix C. Population and Housing by Region and County, 1970-1980, displays in bar chart format the size of the population and the number of housing units for each region and county.

Appendix D. Data Source Guide, lists the sources of data used in the preparation of this report.

^{3/} Persons in group quarters include persons in care or custody in institutions and persons in non-institutional group quarters such as college dormitories, military barracks, monasteries and workers dormitories.

^{4/} Vacant units include seasonal housing, houses held for occasional use, houses for sale or for rent, and houses rented or sold but not occupied.
